Operational Matters
Communications with SEMANTIC and SECANT

REF: NUL-A-717, 9 May 1954 (Not sent to Guatemala City)
NUL-A-1041, 7 May 1954

1. Some confusion appears to have developed with respect to the handling of communications with SEMANTIC and SECANT. Inasmuch as these agents are now in Guatemala it is believed that the most efficient and secure method of communicating with them is through the Guatemala station. Therefore, in the future it should be understood that all directions and requests for information on the part of LINCOLN will be passed to these two agents in this manner.

2. The Guatemalan station should clearly indicate that the request is from CAYLICRIS. In the event that exceptions to this rule appear advisable at any time the stations will be specifically so notified by LINCOLN. Of course, L. [] should inform LINCOLN of any communications directed to SEMANTIC or SECANT which are initiated by L. [] on, either through the courier service or directly by CAYLICRIS' messengers. It should be understood that requests for information to L. [] are meant to be investigated through sources available to L. [] with the exception of SEMANTIC and SECANT.
